

Oybek Malikov

FullStack Developer

Tashkent, Uzbekistan +998(97) 012-95-10 oybekaccn1@gmail.com

[in LinkedIn](#) [Github](#)

Junior fullstack developer skilled in Node.js, Express, NestJS, JavaScript, and TypeScript on the backend, with hands-on experience using HTML, SCSS, and React on the frontend. Experienced with SQL databases (MySQL, PostgreSQL, MS SQL) and NoSQL (MongoDB). Completed several real-world backend projects during training and currently expanding skills in modern frontend development. Passionate about building efficient, scalable, and user-oriented web applications.

PROJECTS

Vassels Management API

[| Github Link](#)

RESTful API for managing ship rentals (also for other products) built with Node.js, Express, and PostgreSQL. Features include authentication, CRUD operations, and role-based access.

Hospital Management Project

[| Github Link](#)

REST API for managing hospital data with doctor-patient records, role-based access, and appointment management.

Questionnaire(AskNET)

[| Github Link](#)

Telegram bot and web platform built with NestJS, Telegraf, Sequelize, and PostgreSQL. Businesses create surveys, track analytics, and manage data via the admin panel. Users complete surveys, earn rewards, and invite friends.

CRM

[Live Link](#) | [Github Link](#)

A React project consisting of the frontend part of the CRM project, an admin panel with all the functionality, and a teacher panel with the necessary functions for teachers.

EDUCATION

National University of Uzbekistan
